MAPED AND ISO 14001

MAPED IS HIGHLY DEDICATED TO ESTABLISHING AN ACTIVE **SUSTAINABLE DEVELOPMENT** POLICY.

On an environmental level, school product manufacture and shipment sites in France are certified in accordance with the ISO 14001 environmental management standard.

Achieving this internationally recognized standard ensures that **MAPED** reduces its impacts on the environment with every passing year:

- ⇒ pollution as a whole,
- ⇒ energy consumption,
- ⇒ water consumption...
- ⇒ water consumption...

With this in mind, the company monitors and anticipates the relevant legislation and ensures optimum pollution prevention, for example by organising numerous simulation exercises.

In France, the project takes the form of installing mini-waste facilities to encourage recycling, integrating our site in an Inter-Company Transport Plan to help employees to optimise commuting to work, or purchasing improved filtering systems which eliminate dust waste almost completely.

This certification process is a **group project** deployed in our production branches in order to ensure that all Maped sites become proactive in taking their environment into account.
